Botium Toys: Controls and compliance checklist

Controls assessment checklist

Yes	No	Control
	\checkmark	Least Privilege
	\checkmark	Disaster recovery plans
	\checkmark	Password policies
	\checkmark	Separation of duties
\checkmark		Firewall
	\checkmark	Intrusion detection system (IDS)
	\checkmark	Backups
\checkmark		Antivirus software
	\checkmark	Manual monitoring, maintenance, and intervention for legacy systems
	\checkmark	Encryption
	\checkmark	Password management system
\checkmark		Locks (offices, storefront, warehouse)
\checkmark		Closed-circuit television (CCTV) surveillance
\checkmark		Fire detection/prevention (fire alarm, sprinkler system, etc.)

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
	\checkmark	Only authorized users have access to customers' credit card information.
	\checkmark	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
	\checkmark	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
	\checkmark	Adopt secure password management policies.

General Data Protection Regulation (GDPR)

Yes	No	Best practice
	\checkmark	E.U. customers' data is kept private/secured.
\checkmark		There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
	\checkmark	Ensure data is properly classified and inventoried.
\checkmark		Enforce privacy policies, procedures, and processes to properly document and maintain data.

System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
	\checkmark	User access policies are established.
	\checkmark	Sensitive data (PII/SPII) is confidential/private.
\checkmark		Data integrity ensures the data is consistent, complete, accurate, and has been validated.
	\checkmark	Data is available to individuals authorized to access it.

Recommendations:

- Poor compliance with PCI DSS standards leave the organisation open to regulator fines and lawsuits stemming from a potential future breach of customer credit card information. Recommend implementing principle of least privilege as well as encryption and secure password management to ensure compliance with PCI DSS. This is of high priority.
- Lack of disaster recovery plan and data backups poses a high risk to the
 organisation in the event of a cyber attack or data loss. Recommend
 development of a disaster recovery plan and offsite backups of critical data to
 ensure business continuity. This is of high priority.
- Irregular maintenance of legacy systems leaves the organisation open to security threats from unpatched security vulnerabilities. Recommend implementation of regular schedule for patching of legacy systems to minimise cyber attack surface area. This is of medium priority.
